#### **Executive Summary**

Members of the project team from the Heirloom Rice Project of MPSPC together with the Research Director, partners from DA, MLGU, MAO, NCIP and the farmers of the Municipality of Barlig, presented their issues and concerns during the consultation and verification of information for the heirloom rice varieties in Barlig.

The activity aimed to verify information that was taken from the different existing heirloom rice varieties in the municipality as a requisite in the Free and Prior Informed Consent requirement of the NCIP. This is done before publishing any information in the making of the Philippine Rice Catalog which will include all traditional rice varieties coming from all the parts of the country.

The activity pushed through with the presentation of lead persons of the activity. Mr. Ceferino Oryan of the Municipal Agriculture's Office of Barlig, presented the partners from MPSPC and DA and a representative from the NCIP of Barlig.

Mr. Joel Faroden of MPSPC, Project Leader of the Heirloom Rice Project, proceeded with the presentation of the agro-morphological characterization of heirloom rice varieties in Barlig. He was followed after by the partners from DA which supplemented other information as presented to the group of farmers. In the process, the farmers in turn examined carefully the data being presented and complemented or corrected information that were incorrect. The verification of data turned out well with new added information which will take part in the said report.

After the verification, it was then explained to the group that a MOA signing will be

done after. The signing of the MOA signifies that the group is willing to disclose the information taken for the publication of the said Philippine Rice Catalog. The group then agreed and proceeded with the signing of MOA. Mr. Oryan then gave a few instructions for the continuing activities of the Heirloom Rice Project before formally ending the program.

## II. RATIONALE:

The Heirloom Rice Research and Extension Project in Mountain Province funded by DA-CAR were started in July 2014. Three self-help groups (SHGs) namely Poblacion Barlig RTFC, Kadaclan RTFC in Chupac Barlig and Blooming Hills RTFC in Bauko was identified as beneficiaries of the project. The SHG's was subjected to participatory needs and opportunities assessment, rapid value chain assessment and profiling.

Whereas, results based on the assessment conducted was the highlights of identified interventions in relation to heirloom rice production and value adding activities. One intervention is to conduct researches that will increase heirloom rice yield and increase income of the farmers. Identified researches are the following 1) Effect of different organic fertilizers on the growth and yield of heirloom rice, 2) Growth and yield of heirloom rice applied with microbial inoculants, 3) Participatory management of common pest and disease, and 4) Agro-morphological characterization of heirloom rice varieties. The researches was already established in Kadaclan and Poblacion Barlig and in Banao, Bauko.

Other interventions and assistance was provided and to be provided by the following agencies such PhilRice, DA-RFO CAR, MLGU's and PLGU Mountain Province. Since the project was already providing interventions/assistance (by different agencies) there is a need to present for the sake of transparency to the concern beneficiaries the on-going researches and intervention provided in compliance to IPRA Law.

## III. OBJECTIVES:

Specifically, the activity wants:

1. To present the on-going four studies;
2. To present the intervention provided by different agencies; and
3. To visit the on-going researches.

## IV. METHODOLOGIES

This activity will be employing various strategies but not limited to the following:

1. Participatory discussions.
2. Power point presentation
3. Question and answer
4. Farm visit
